

# Serve Nutritious Meals to Children and Earn Cash!

That's right. The Child Care Food Program will reimburse family child care providers for some of their child care food costs.

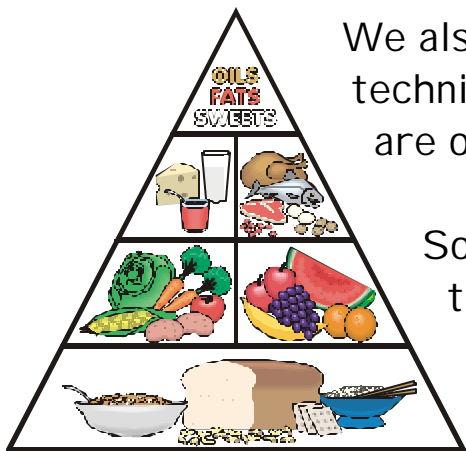

And we don't stop there. We also offer:

- fun nutrition workshops
- consultation with nutrition specialists
- help dealing with parents on food related issues
- assistance with planning nutritious meals

Plus, parents know that providers who participate in the Child Care Food Program serve their children nutritious meals and snacks. That gives you a competitive edge when you market your services.

So what's the catch? There is none. You serve children nutritious meals and snacks based on easy-to-follow US Department of Agriculture guidelines and keep records of what and who you served. We pay you. It's that simple.

We also visit your home three times a year to provide technical assistance and professional support. And, we are only a phone call away to answer your questions.

Sound too good to be true? See for yourself what the Child Care Food Program can do for your child care business. Contact the Food Program today at 703-324-8000!
